Researchers discuss STS-87 mission results Friday at Center

From universities and NASA centers across the United States, researchers gather Friday at the Marshall Center to discuss results from the fourth flight of the U.S. Microgravity Payload. Seven major experiment payloads were managed by the Microgravity Research Program at Marshall. This 16-day Space Shuttle mission focused on scientific investigations potentially important to industry and the economy. Computers, infrared detectors, superalloys and gasoline products may all be improved by results from experiments conducted aboard the Space Shuttle Columbia in December 1997.

Mandatory security briefing continues Monday at 8:30, 10 a.m., 1:30 and 3 p.m. in Morris Auditorium

All-hands meeting Jan. 29

An all-hands meeting will be held at 2 p.m. Friday, Jan. 29, in Morris Auditorium. Center Director Art Stephenson will share plans and the schedule for the proposed Marshall Center reorganization. The meeting also will be shown on closed-circuit television.

Section of Martin Road to close

Due to piping installation, a section of Martin Road will temporarily close from 6 p.m. Friday to 6 a.m. Monday, Jan. 25. Through traffic should detour via Rideout or Dodd roads. Local traffic will be detoured around the barricades.

"Believe in safety"
